

## **Microsoft Teams**

Teams moved toward contextual intelligence and richer collaboration experiences by integrating Copilot-style assistance, real-time translation, and immersive whiteboarding tools.

2025 — Integrated Copilot AI assistant generating action summaries. Widely adopted in enterprise meetings.

2026 — Added live translation and sentiment detection. Expanded corporate user base in EMEA/APAC.

2027 — Hardware availability limited usage. Popular among design and R&D teams. Released AR whiteboard and immersive meeting mode.

2028 — Introduced adaptive prioritization and smart alerts. Improved focus metrics and reduced missed follow-ups.
